-A Note from the Directory

Last Spring some 30 History graduate students heeded the call to attend an important general meeting. Out of that session came a plan for this year's Graduate Student Colloquium.

The Colloquium presents an especially important opportunity to students who have already completed their seminar requirements. Seldom maintaining a dialogue with their colleagues while writing their master's theses or doctoral dissertations, they have lost touch with the graduate student community. Although this problem frequently arises in programs admitting students who work full-time, there is no reason to accept it with equanimity. Participation in the monthly colloquium can renew the intellectual exchange and sense of community that many students are missing. I look forward to seeing you at the first meeting:
